Hard Drive	250 MB for cache files	2.0
Network	3com or Intel.	Â
Input Device	Keyboard and Mouse	Â
Monitor	Minimum Supported Resolution 1024 x 768	Â

Â

* Older Windows Server platforms (Server 2003, 2008) are not supported at this time. Virtual environments or Windows emulation are also unsupported.Â

** Applies to leased product only. Ownership requires floppy drive.

*** Broadband connections are defined as Cable Internet, DSL 1.5 Mbps or higher, or T1 and higher connections. Satellite and wireless connections are generally not advisable.

Â¹Active Directory/Domain environmentsÂ are not supported; only peer-to-peer workgroups.Â Windows Server 2012 Foundation and Essentials are not supported and both versions come with the Domain Controller feature of Windows Server in a state where you cannot disable it.

The minimum requirements listed above apply to the current set of applications; they may not be compatible with future software releases. Please note the majority of Snap-On applications require administrator-level privileges. Attempts to limit user permissions may result in incorrect program function. If you have any questions, or for the most current information, please contact Technical Support at 888-724-6742.
