

ACDelco PLC Electronic Parts Ordering Installation

Requirements

Mitchell 1 Manager/ManagerPlus version 5.8 or higher. Ideally, the shop should be using Windows 2000 or XP and the Network must have connectivity to the Internet. The Internet connection should be a broadband connection (dial-up can work if broadband is not available).

Medium

- The ACDelco Catalog and Parts and Labor control is supplied on DVD-Rom from ACDelco, both initial installation and quarterly update material.
- The catalog can be loaded on a shared drive making it accessible to all users on the domain or workgroup network.

Functionality

Provides fast part lookups and ordering using category/sub-category, manual entry, part number and description look-up, keyword searches and Mitchell 1 labor.

Enabling WISE Catalog Functionality

- The WISE catalog functionality is turned on by using Ctrl + Alt + D on the front screen, and supplier locations are configured through the Supplier Setup process in Mitchell 1.
- The ACDelco catalog is accessed from the ACDelco button on the Order screen.

Vendor Setup

- Installers wishing to use the WISE system should contact the WISE Help Desk, at **800.825.5886 Option 3**. The vendor will arrange for a WISE team member to contact the installer for installation and setup.
- After creating a vendor record in Mitchell 1 Manager, click on the Setup Link button and choose 'Setup ACDelco'.
