ProDemand[®]
Repair Information + Real Fixes

 1Search[™] Plus

ProDemand - 1Search Plus

Repair information that thinks the way you do

When you search for repair information, you know exactly what you're looking for. Now ProDemand does, too.

1Search™ Plus takes your repair information to a whole new level of intelligence with advanced search technology that scans the vast database of Mitchell 1 content and returns only the specific information you need.

Select a vehicle, enter a search term, and 1Search Plus returns information in a unique graphical layout, organized in the same flow that auto technicians use when approaching a diagnosis and repair. The card-based format delivers results in specific categories, leading you directly to the information you want and cutting out the clutter.

OEM and SureTrack® real-world information are more tightly integrated and returned together in a single location. You'll instantly find related TSBs, Real Fixes, specifications, component test information, color wiring diagrams, and removal/replace procedures — no more switching between tabs or scrolling through long lists of articles.

Key features include:

- ▶ Intuitive and easy-to-navigate graphical format
- ▶ Results presented in a logical sequence that matches the technician's natural workflow
- ▶ More targeted results reduce time spent searching
- ▶ Advanced search technology delivers only data relevant to your vehicle and search term
- ▶ User interface mirrors the Snap-on ZEUS® diagnostic platform, coordinating your repair information and diagnostic tool to save even more time
