Been paying for this for months, what good is it if you have no idea how to use? John, Thank you for contacting us! If you've never used our software before, it is recommended to view our Manager Training Videos to learn everything from basic operations to advanced features available to you in our management software. Click on the following link or copy and paste in your web browser: 
http://m1training.net/get2know/managerse/ There is also a built-in help feature within the management system, so if you are looking at something you are not too sure about, press the "F1" key next to the ESC key on your keyboard for more information about the area you have currently accessed. If you need more information on a particular section in the Manager Program and the "F1" key is a little too vague, try the "Training Videos" menu on the top toolbar and click "How Do I...". These are more videos on how to use the software but are more geared toward particular topics or categories of the Manager Program. Please join us at the shop management users' forum to keep up with developments and compare notes with how other shops are using this software. Click the Forum button in your software or just type managerforum.net on any PC or smartphone with internet access. If you require additional assistance, please contact Technical Support @ 888-724-6742, option 4. We are here Monday through Friday between 5:30am to 4:30pm Pacific time. Thanks for using Mitchell1!
