

Export 5.9 data to Excel 2002/2007

Article Number: 126 | Rating: 2/5 from 5 votes | Last Updated: Thu, Aug 23, 2012 at 4:27 PM

Use the attached document to export shop mgmt data to Excel spreadsheet file.

NEW! We've added a version that covers this procedure when using Excel 2007.

NOTE 1: If you're using a ShopKey product, the database options will differ from those show in this documentation. Substitute ShopKey SW or ShopKey Management for the MMS Series options shown.

NOTE 2: There are no spaces before either the Login name or password fields for accessing your database. These are case-sensitive and must be entered exactly as shown.
