

"Cannot Locate Vehicle" - ShopCAT Button Inside Mgmt

Article Number: 22 | Rating: Unrated | Last Updated: Wed, Jun 11, 2008 at 1:39 PM

If you get this error message when attempting to access SHOPCAT from Manager with a 2006 or newer vehicle, but everything works in SHOPCAT run stand-alone, replace the **cas.dat** file which is found on the Winners Circle of Support or Supercharge quarterly update CD. The file is located in the lease/update folder on the update CD. The file for SHOPCAT is located in LaserCat/Program/Data folder.
