

Mgmt Files Recommended for Backup EVERY Day

Article Number: 76 | Rating: 1.7/5 from 3 votes | Last Updated: Wed, Aug 25, 2010 at 7:38 PM

Manager features Automatic Backups. This feature prompts you to automatically back up your data at pre-defined intervals (program startup, shut-down, or end of day) and then copies the files you would need to restore your database to a location you specify. You set the location (Drive letter and path) in Setup / Shop Data Setup / Default Settings - (lower right corner of screen). The SMCORE32 (ShopKey = SKCORE32) database includes invoices, estimates, orders, customers, vehicles, vendors, parts, canned jobs, part kits, packages, basically everything. All of these files are compressed into a WinZip file named after the days of the week; D1.zip is Sunday, D2 is Monday and so forth.
