TruckSeries

Repair Information for Class 4-8

TruckSeries - 1Search Plus

Repair information that thinks the way you do

When you search for repair information, you know exactly what you're looking for. Now TruckSeries does, too.

1Search™ Plus takes your repair information to a whole new level of intelligence with advanced search technology that scans the vast database of Mitchell 1 content and returns only the specific information you need. It's all targeted to the Class 4-8 truck in your bay and streamlined in an easy-to-use graphical design.

Select a vehicle, enter a search term, and 1Search Plus returns information in a unique, user-friendly layout that resembles the apps you see on a smartphone. The card-based format presents targeted results in specific categories, leading you directly to the information you want and cutting out the clutter.

You'll instantly find vehicle specifications, test procedures, component connector information, component locations and operations, wiring diagrams, remove & replace procedures, after-repair information, and labor estimating* — no more switching between tabs or scrolling through long lists of articles.

Key features include:

- ▶ Intuitive and easy-to-navigate graphical format
- ▶ All vehicle information is delivered together
- ▶ More targeted results
- ▶ Cards only populate when relevant information for the selected vehicle is available

*TruckLabor estimating is an optional add-on feature.
