ProDemand® – ADAS

The Industry's Fastest Access to Driver Assist Repair Information

Have you seen vehicle features like adaptive cruise control, parking assist systems and blind spot indicators in your auto repair shop? All of these technologies (and many more) fall into the new category of vehicle systems known as ADAS – Advanced Driver Assistance Systems. If you haven't encountered ADAS yet, you will soon as these next generation of vehicles make their way into the aftermarket for service and repair.

ADAS is impacting even common jobs – like wheel alignments – that you may have in your bays right now. ProDemand streamlines the search process by consolidating the information you need to diagnose, calibrate and repair these systems. Having all the details together in a single location can help you save time by providing a full picture of all ADAS-related features on the vehicle.

ADAS Information at Your Fingertips

You'll find everything right where you need it, starting with the QuickLink ribbon on the very first screen of ProDemand. Depending on the year/make/model, some of the ADAS features you are likely to see in your shop include:

- ▶ Collision Warning Indicator
- ▶ Lane Departure Alert
- ▶ Adaptive Cruise Control
- ▶ Blind Spot Indicator
- ▶ Automated Parking
- ▶ Automatic Emergency Braking
- ▶ Lane Assist
- ▶ Adaptive Headlights
- ▶ Rear Cross Traffic
- ▶ And much more

Here's How Easy It Is

Simply select a vehicle, click the **Driver Assist – ADAS** Quick Link button, and you have immediate access to a table listing all ADAS features for the vehicle and the specific components contributing to the operation of those ADAS features.

ProDemand lets you know at a glance if the components associated with the ADAS feature will require calibration, special tools like targets, or a scan tool to complete the job.

Select a component in the list and 1Search Plus delivers the relevant information in a user-friendly card format. Simply select a card to drill deeper into the details you need to dive into the job with maximum efficiency.
