## Your New Portable Vehicle Check-in and Inspection Solution

Supercharge your Manager™ SE shop management system with a mobile option that lets you take the system with you beyond the walls of your shop to complete the vehicle intake and inspection processes right at the vehicle.

Using your Apple or Android tablet or smartphone, scan a VIN or snap a photo of the license plate and ProSpect decodes the VIN or plate and searches for a matching vehicle in the customer database. When one is found, you can quickly start an estimate and launch a multi-point inspection. For new customers, just create a new vehicle record and you're on your way.

### Greet Your Customers and Get to Work

ProSpect offers fully wireless functionality and seamless integration with Manager SE, so you can proactively greet your customers and start addressing their vehicle concerns before they step inside to the front counter.

- ▶ Quickly ID vehicles using VIN decode or Plate-to-VIN lookup
- ▶ Start Manager SE estimates right from your mobile device
- ▶ Customize multi-point inspections (MPIs) – even tires
- ▶ Document vehicle inspection findings with photos & tech notes
- ▶ Apply Manager SE canned jobs to address vehicle issues found

### Benefits of ProSpect Include:

**Increase Efficiency:** Take ProSpect with you to the vehicle and get the service started faster.

**Save Time:** Use your tablet/phone camera to snap a photo of a license plate to quickly confirm vehicle-specific data (make, model, trim, engine, etc.) and record it to Manager SE with the press of a button.

**Enhance Customer Confidence:** Demonstrate your professionalism with multi-point inspections and make a positive first impression on your customers — you also get faster approval of additional work needed.

**Consistent Inspections:** With customizable multi-point inspection templates, tailor inspection details to consistently reflect your business guidelines every time they are applied.

**Gain mobility:** Greet customers, start estimates, perform inspections, add jobs, even view WIP/appointments — all quickly from the vehicle.\*

\* Mobile device must be connected to same local area network (LAN) as Manager SE host.
